

CROSS-UPDATE STRESS TESTS FOR COSMOLOGICAL-CONSTANT MECHANISMS MACHINE-BACKED RELEASE MANIFEST

Scholarly work:

Cross-Update Stress Tests for Cosmological-Constant Mechanisms:

A Pre-Specified Framework Across Perturbative, EFT, and Physical-State Changes

Release class:

Four-layer machine-backed scientific release package

Coordinated package version:

1.0

ZENODO IDENTITY

Version-specific DOI:

10.5281/zenodo.23174925

Release status:

New scholarly artifact / new Zenodo record

GITHUB IDENTITY

Repository:

Cross_Update_Stress_Tests_Cosmological_Constant_Mechanisms

RELEASE COMPONENTS

1. Scientific anchor

Filename:

Stress Tests for Cosmological-Constant Mechanisms v1.7.txt

SHA-256:

b76f6550b93781f6bb06fad3c73b475cb1bfd7291ac8f749b06a640284b49120

2. Human companion

Filename:

CCP Contract and Adapter Companion v0.7.txt

SHA-256:

82754f524d2a1a974d49b21b1dd3a0de97ccc653bb42fa5ffdaecdb9d7ff8f54

3. CCP domain adapter

Filename:

CCP_Stability_Routing_Adapter_v0.7_CONSOLIDATED.lean

SHA-256:

41df602dfd20f0a4e9ddeb8e3411471f2572a999e310744f0003363f0cee49f9

4. Universal Kernel

Filename:

Structural_Flow_Universal_Kernel_v1.0.lean

SHA-256:

b455ec869d062f0fc05d239c5006c843165cd598edbd8c35eae442ff471689a3

MACHINE LOAD RELATION

1. Structural_Flow_Universal_Kernel_v1.0.lean
2. CCP_Stability_Routing_Adapter_v0.7_CONSOLIDATED.lean

Machine-check status:

The current CCP adapter was checked twice in browser Lean against the unchanged Structural Flow Universal Kernel v1.0 with no messages.

AUTHORITY ORDER

Physics and domain evidence supply the physical premises, calculations, transitions, observations, comparator support, uncertainties, and scientific adjudications.

The scientific anchor owns the scientific questions, cross-update discipline, comparison logic, claim limits, and worked sequestering analysis.

The human companion owns execution guidance, burden interpretation, evidence records, requiredness discipline, public reporting, and human-to-machine translation guidance.

The CCP adapter maps already-adjudicated scientific states into encoded burdens, support conditions, licenses, and routing consequences.

The Universal Kernel supplies reusable domain-neutral formal machinery.

Lean checks encoded conditional consequences.

Machine-clean is not physics-confirmed.

PACKAGE CEILING

This release does not establish that the cosmological-constant problem is solved, derive the observed numerical value of the cosmological constant, identify dark energy with vacuum energy, or allow machine execution to manufacture empirical premises.
